Buttons to customize the message: - Text - Phone Number - Number Template - Number Prefix - Number Suffix - Subject Line - Add a new contact Send SMS from your computer using SmartText for Windows [image=] SmartText SMS for Mac [image=] SmartText SMS for iOS [image=]   ## Customize Senders You can either create a new sender group named "SMS Group" or you can choose from the list of currently configured group names. You must select one or more groups from the list of currently configured groups. SmartText SMS for Windows is able to send a message to multiple recipients by their mobile phone numbers. Your personal contact information is automatically saved in the phonebook where recipients can be found by their phone numbers. [image=] If your contact information is not automatically saved to the contact book, see : [How to save contact information](How_to_save_contact_information.md). You can send to multiple mobile phones by selecting them in the drop down list. You can select multiple mobile phones by holding the [Shift] (Windows) or [Cmd] (Mac) keys while clicking on the individual mobile phone numbers. You can also select multiple mobile phones by holding the [Ctrl] key while clicking on the mobile phone numbers. SmartText SMS for Mac has a different layout than its Windows counterpart. Click on the [**Show/Hide**] button to expand the group box and choose the number of recipients you want to send the message to. [image=] ## Bulk SMS You can bulk send
